COVENANT TO RESTRICT USE OF PROPERTY  
ENVIRONMENTAL RESTRICTION  
FOR THE CHEVRONTXACO 5K SITE  
HAZARDOUS WASTE MANAGEMENT FACILITY

This Covenant and Agreement ("Covenant") is made by and between ~~ChevronTexaco U.S.A. Inc.~~ *RMB*  
~~Exploration and Production Company~~ (the "Covenantor"), the current owner of certain property *JAT*  
situated southeast of the city of Taft, County of Kern, State of California, described in Exhibit A,  
attached hereto and incorporated herein by this reference (the "Property"), and the Department of  
Toxic Substances Control (the "Department"). Pursuant to Civil Code section 1471, the  
Department has determined that this Covenant is reasonably necessary to protect present or future  
human health or safety or the environment as a result of the presence on the land of hazardous  
materials as defined in Health and Safety Code section 25260. The Covenantor and the  
Department, collectively referred to as the "Parties", therefore intend that the use of the Property  
be restricted as set forth in this Covenant, in order to protect human health and safety and the  
environment.

ARTICLE I  
STATEMENT OF FACTS

1.01. The Property, totaling approximately twenty acres is more particularly described  
and depicted in Exhibit A, attached hereto and incorporated herein by this reference. The  
Property is located in Section 5, Township 12 north, Range 23 west, approximately seven miles  
southeast of Taft and approximately one half mile northwest of the junction of Route 166 and  
Pentland Road in the County of Kern, State of California. This property is more specifically  
described as  
Kern County Assessor's Parcel Number: 239-140-04..

November 2004

1.02. On December 14, 1979 the Department's predecessor agency, California Department of Health Services, issued a permit to authorized the use of the Property as a land treatment facility ("Facility"). Under this authorization, the Property was a hazardous waste facility regulated by the Department, subject to the requirements of the California Hazardous Waste Control Law ("HWCL"), Health and Safety Code section 25100 et seq., and the federal Resource Conservation and Recovery Act 42 U.S.C. section 6901 et seq.

1.03. Pursuant to the closure requirements of the HWCL, including Health and Safety Code section 25246 and the California Code of Regulations, Title 22, Section 66264.110 et seq., the Department circulated the Closure Plan, which referenced a Final Health Risk Assessment, together with a draft Negative Declaration pursuant to the California Environmental Quality Act, Public Resources Code section 21000 et seq., for public review and comment from June 15, 1994 to July 15, 1994. The Department approved the Closure Plan together with the Negative Declaration on September 8, 1994. Because hazardous wastes, which are also hazardous materials as defined in Health and Safety Code sections 25117 and 25260, remain in the soil at the Property, the approved Closure Plan provides that a land use restriction is required as part of the closure of the Facility.

1.04. The closure of the Facility involved the installation of a permanent vegetative cover to control soil erosion and to prevent water and wind borne erosion and off-site transport of soil or waste material. The vegetative cover consists of drought tolerant native grass and shrub varieties chosen for adaptability to the area.

1.05. As stated in the Final Health Risk Assessment as approved by the Department on June 8, 1994, the surface and subsurface soils of the Property contain hazardous wastes and hazardous materials, which include the following contaminants of concern: boron, chromium, nickel, lead and petroleum hydrocarbons. Based on the Final Health Risk Assessment, the Department concluded that use of the Property as a residence, hospital, school for persons under the age of 21, or day care center would entail an unacceptable cancer risk. The Department further concluded that the Property, as remediated and as its use is limited by this Covenant, does not present an unacceptable threat to human health or safety or the environment.
